

Smart  
Sustainable  
Efficient

**IsZEB Cluster** was founded in 2020 by partners with vast experience in supporting innovation and entrepreneurship, with the aim of providing advice, tools and guidelines to the **construction industry** for the entire lifecycle of a **smart zero or positive energy building**.

The vision of the cluster is to support and upgrade the **Digital Construction in Greece**, while strengthening every company related to the construction sector.

## Member Benefits

### • Extroversion & Networking

Promotion and support the IsZEB members through the various cluster activities. Provision of reliable and continuously updated information on new opportunities, events, innovative tools and results stemming from the research projects, to exploit the full potential of the construction industry.

### • Specialized Know-how

Experience in supporting innovation and entrepreneurship. Specialization in every aspect of the construction industry, deriving both from the wide network of founding partners, and the research activities of the cluster at National and European level.

### • Wide network of partners

Developing strategic collaborations between members and partners, promoting technological knowledge and encouraging synergies with the aim of creating new products, services and processes.

## Become a Member of IsZEB

The **IsZEB Cluster** connects the entire **innovation ecosystem**, all around the **construction industry**. Members of IsZEB can become Start-ups, Small and Medium Enterprises, Freelancers and Self-employed professionals.

For more information on how to become a member please visit [www.iszeb.gr](http://www.iszeb.gr) on the members page, or contact us at [info@iszeb.gr](mailto:info@iszeb.gr).
